

PRESS RELEASE

9 October 2025 | Warsaw, Poland

Title:

Volta Polska launches #VoltaEnergyLAB – first webinar on the role of cPPA in ESG strategies

Summary:

On October 23, 2025, at 10:00 CET, Volta Polska will inaugurate a new expert series under #VoltaEnergyLAB. The first webinar, led by Michał Turowski, will show how corporate Power Purchase Agreements (cPPA) can strengthen ESG ratings, support regulatory compliance, and stabilize energy costs for businesses. The event is particularly valuable for companies seeking to enhance their credibility with investors and customers while meeting growing expectations in sustainable development. The session will be presented in Polish.

Volta Polska, an independent renewable energy producer and part of the Volta Group, is launching the #VoltaEnergyLAB expert series to share insights on the latest trends in corporate sustainability. The first webinar, scheduled for October 23, 2025, and led by Michał Turowski, provides an opportunity to engage with market practitioners and learn practical approaches to strengthen ESG ratings, stabilize energy costs, and implement strategies compliant with the Corporate Sustainability Reporting Directive (CSRD) and the EU Taxonomy.

Amid increasingly demanding EU regulations and rising pressure from investors and customers, companies face the challenge of building transparent climate strategies. One of the key tools is a corporate Power Purchase Agreement – a long-term contract to purchase renewable electricity directly from producers. A cPPA helps businesses stabilize energy costs, supports compliance with CSRD and EU Taxonomy requirements through transparent reporting of emission reductions in line with the GHG Protocol Scope 2 Guidance, and builds a competitive advantage by demonstrating tangible ESG action to customers and investors. Purchasing electricity directly from producers also accelerates the path to climate neutrality by shortening supply chains and increasing the effectiveness of environmental initiatives. Registered participants will have the opportunity to join a live Q&A and book one-on-one consultations with the Volta Polska team. The session will be presented in Polish. The event is free; registration is available here: [LINK](#)

Quote:

"cPPA is now a key element of corporate strategies for companies seeking to secure their energy costs while simultaneously achieving ambitious sustainable development goals. The dynamic growth of the cPPA market shows that more and more companies see this model as a fundamental tool for building competitive advantage and environmental responsibility," said Michał Turowski, Business Development Manager at Volta Polska.

"More and more global companies are choosing cPPA as their preferred way to purchase energy, which confirms the model's status as a new business priority. At Volta Polska, we support companies in this transformation by combining our experience and knowledge with the resources of the international Volta Group," added Stéphane Rauber, Managing Partner at Volta Polska.
